DEPURECO SOLUTIONS!**

# GENERAL CLEANING

Versatile and effective solutions for general cleaning or overhead applications offer powerful suction and filtration capabilities to maintain clean and safe workspaces.

# ADDITIVE MANUFACTURING

Industrial vacuum systems essential for post-processing operations and maintenance, ensuring high-quality production and reducing the risk of equipment damage.

# WELDING FUMES

Solutions to effectively capture and remove hazardous welding fumes and particulates, promoting a safer and healthier work environment.

# SANDBLASTING

Solutions providing efficient recovery of sand or steel grit, improving safety and effectiveness of the processes.

# CLEANING OIL TANKS

Industrial vacuum systems for CNC machinery applications, providing efficient and reliable removal of oil, coolant and oil mists to maintain optimal operating and environment conditions, extending the lifespan of the equipment.

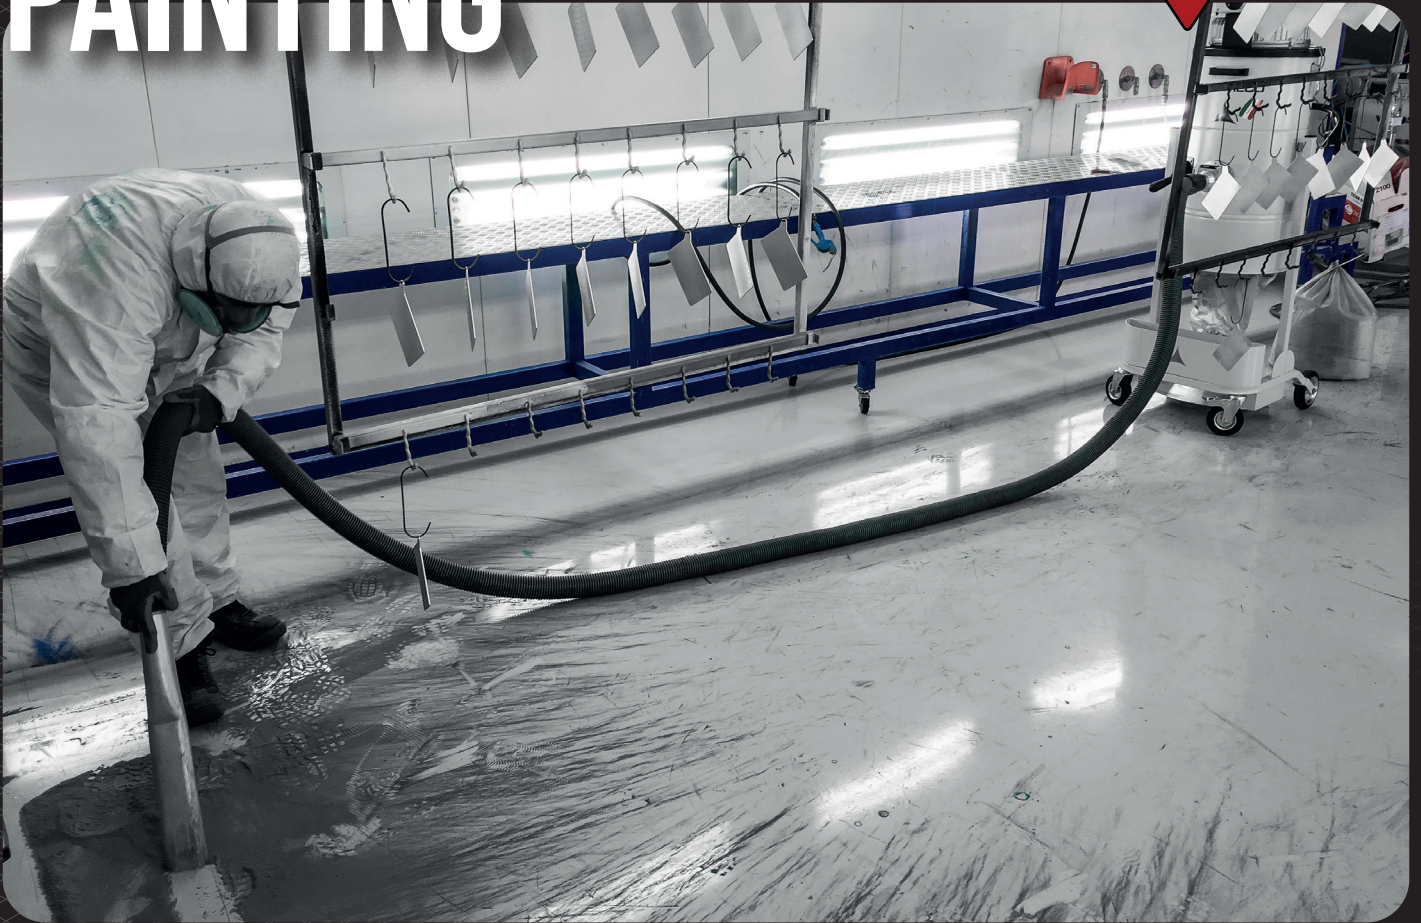

# METAL CHIPS CLEANING

Highly efficient, large collection and cost-effective solutions for keeping workspaces clean and safe.

# INDUSTRIAL PAINTING

Vacuum solutions providing effective removal of overspray, dust, and debris, resulting in high-quality finishes and reduced contamination, ensuring a safe and healthy work environment.
